

# Introducing Microsoft Teams

Your new hub for team files, conversations, and meetings. All in one place, wherever you go.

## One place for conversations, meetings, and calls

Chat privately one-on-one or have instant group conversations. Join meetings with HD audio and video, all in one place, instead of multiple apps.

## Collaborate with integrated Office 365 apps

Office apps and services that you use every day—Word, Excel, PowerPoint, OneNote, SharePoint, Stream, and Power BI—are built-in, giving you access to files and tools in one place, so you stay in your workflow.

## Security and compliance

Teams is integrated into Office 365, which means it features the enterprise-grade security and compliance you need.

## Tailor your workspace

Get notifications and content from services you care about—Trello, GitHub, Adobe Creative Cloud, SurveyMonkey, and many more.

# Start using Teams
